

Hichrom Short Seminars – opportunities to improve your skills - for busy chromatographers

A series of short (1-2 hour), low cost seminars exploring a wide range of topics. These courses represent valuable opportunities to improve your skills and knowledge in key areas of chromatography and keep up-to-date with the latest developments

Who should take these courses?

These short seminars aim to provide busy chromatographers with the opportunity to keep up-to-date with the latest developments and key skills in the industry, without placing burdensome demands on hectic work schedules. If you are involved in practical, 'hands-on' chromatography and want to stay ahead of the competition, then these low cost, concentrated learning experiences are ideal for you. These seminars last approximately 1 to 2 hours and can be delivered as breakfast, lunch or evening seminars (or any other time!), either at your company or at a venue local to you, at a convenient date and time. Following the main seminar, an opportunity for delegates to stay on for an open Q&A session, or a more in-depth discussion about a specific problem or topic, can be arranged.

Practical Chiral Chromatography

This short seminar is intended as an introduction for those scientists who are involved in chiral chromatography and want to use the technique to assist in their analysis. Specifically aimed at end-users in the field, this seminar will give an understanding of the processes involved and the current approaches to chiral analysis conducted in industry. Written from an end-users perspective, this course is ideal for those chromatographers involved in practical chiral method development and those who want to develop more robust methodology that is fit for purpose. The following topics will be covered during this seminar:-

- Importance of chiral separations
- Recognition processes
- Interaction mechanisms
- Chiral analysis
- LC vs SFC
- Method development approaches
- Column screening strategies
- Preparative scale-up
- Real life pharma applications
- Troubleshooting

Available as an in-house or off-site course. Contact us for details
